

IVAN L. TESORERO

GAME PROGRAMMER

Naga City, Philippines • +639937635110 • ivantesorero0@gmail.com

Portfolio: 1pcburgersteak.github.io/portfolio-website

Open to Full-time, Contract, and Freelance Roles • On-site or Remote

SUMMARY

Game programmer with 2 years of hands-on Unity development across 13+ projects spanning multiple genres built through game jams, solo work, academic projects, and paid client work. Strong in C# gameplay systems, with working knowledge of C++ and Unreal. Experienced in gameplay programming, AI, roguelike systems, and online backend systems (PlayFab). Comfortable owning a feature end to end, and engine-agnostic at the fundamentals level. Also contributes game design and level design, building systems with player experience in mind.

CORE SKILLS

Languages: C#, C++

Engines & Tools: Unity (primary), Unreal Engine, Git/GitHub, Visual Studio, Playfab, Firebase, Maya, Adobe

Programming: Gameplay Systems, Enemy/Boss AI, Random Generation, Multiplayer, Online Backend & Microservices, Save systems

Design: Game Design, Level design, Difficulty balancing, Systems design

Professional: Teamwork, Adaptability, Communication, Time management

SELECTED PROJECTS

Rakazon Convergence *Turn-Based Gacha · Mobile · Unity · Team (WIP)*

Built the online backend and a microservice handling game logic; implemented heroes, equipment, quests, custom events, stages, and battle systems using Playfab.

Sort It Out *3D Adventure · Unity · Team · Capstone Project*

Programmed movement and waste-sorting mechanics, a roguelike save system, and random room generation.

Dragon Gears *2D Platformer · PC · Unity · Solo*

A Megaman X inspired solo project: programmed platforming/movement, a boss fight with custom AI, and design the first full stage.

Saldang *2D Action Roguelike (bullet hell) · Unity · Team*

Programmed the combat and survival loop plus a randomized reward system. Won 2nd Place, Bicol Myth Game Jam (Nov 2025).

Mr. Cupido *Point and Click · Unity · Team*

Programmed matching and shooting gameplay and a random NPC generation system. Top 19 Semi-Finalist, Young Creatives Challenge S2 (2024).

Bolz *Arcade brick-breaker · Mobile · Unity · Solo*

Built a level-up system with unique power-ups and dynamic difficulty scaling; created all art assets.

MendVille 2D Educational puzzle · Unity · Team · Paid Client project

Contributed programming and design to deliver an educational genetics puzzle game built to a client brief for a research requirement.

Additional projects (Tank Survivor, Bullet Storm, Box Race, Park Keeper, Space Defense, Bouncer) viewable in Portfolio.

AWARDS

- 2nd Place — Bicol Myth Game Jam, hosted by Bicol University (2025)
- Top 19 Semi-Finalist — Young Creatives Challenge Season 2 (2024)

EDUCATION

BS in Entertainment Multimedia Computing (Major in Game Development)

Bicol State College of Applied Sciences and Technology (BISCAST)

Camarines Sur National High School

ICT (Junior High) · Computer System Servicing (Senior High)

TRAININGS

- Introductory Workshop on UX Design for Students — DICT Region V (Bicol)
- Innovations in Multimedia Animation & Game Development — Game Developers Association of the Philippines
- Understanding Smart Contracts — DICT Dinagat Islands
- MACE Production Summer Training Camp — Multimedia and Creative Enthusiasts
